BRIEF SUMMARY

I am writing to express my strong interest in the Web Developer position. As a recent graduate with a Master's degree in Computer Science from [MIT ADT University], I am eager to apply my technical skills and passion for web development to contribute to your company's success. During my academic journey, I gained extensive knowledge in programming languages such as HTML, CSS, JavaScript, and various frameworks like React and Angular. I have hands-on experience in developing responsive and user-friendly websites through projects. One notable achievement was creating a Campground Listing website for a tourist, which allowed me to learn about integrating payment gateways and implementing effective UI/UX design principles. As a quick learner with a strong problem-solving mindset, I am confident in my ability to adapt to your development environment and contribute to your ongoing projects.

KEY EXPERTISE

java   python   html   css   java script   node js   express js

10th	Telangana State Board	CGPA: **8.20** / **10**	

PROJECTS

Yelp Camp   29 Nov, 2023 - 30 Jun, 2024

Mentor: Sai Charan. Kamble | **Team Size:** 1

Key Skills: HTML   CSS   Javascript   NodeJS   Express.js   AJAX   Passport   MongoDB   ejs

Project Link: https://github.com/charanrocky/Yelpcamp

It is a web application designed to feature prices and reviews of campgrounds to the user so that they can make an informed decision on their next trip. It is designed using express, node.js, MongoDB, and Bootstrap, passport.js was used to handle authetication. The Project is useful for the users to gather information and the geographic location of the campgrounds. People interested in camping get to camping spots with difficulties and find it being overcrowded or polluted by others campers. The site users the feedback of the people already visited a specific camp to make easier decisions for other campers. So it is helpful the choose the camping spots based on this feedback.
